THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

Allowable Subject Matter

Claims 2, 4-8 are allowed.

1. The following is an examiner's statement of reasons for allowance: The claims are allowed for at least the reasons as set forth on page 4-5 of applicant's response filed 08/09/2010, and prior art of record does not disclose, in single or in combination of:

Claim 2, ... stacking the data frame with (i) at least one inner MPLS label uniquely addressing a PCM system within the second circuit switched node and (ii) at least one outer MPLS label identifying a fixed path of consecutive packet switched nodes within the packet switched network, said outer label includes addresses of all the packet switched nodes included in the fixed path in addition to an address of the second circuit switched node... in combination with other limitations recited in claim 2.

The closest prior art Kuehnel (2004/0202148) discloses a system for streaming data transport over a multi-protocol label switching (MPLS) network, comprising an ingress router that comprises a first multiplexer that receives and processes at least one input data stream and outputs single stream data comprising a plurality of data packets, each of said plurality of data packets having a data portion, an IP traffic generator that generates IP routing packets at a fixed or dynamic predetermined interval in response to a trigger signal, a second multiplexer, coupled to said first multiplexer and said IP traffic generator, that inserts said IP routing packets into said single stream data, and a

Art Unit: 2471

first MPLS converter, coupled between said second multiplexer and said MPLS network, that attaches a label to each of said plurality of data packets to generate a combined data stream comprising a plurality of data packets of a first type interspersed between a plurality of data packets of a second type, each of said data packets carrying address information generated in accordance with each of said IP routing packets, wherein one-to-one mapping is performed between said label and said address information of the said IP-routing packets. Kuehnel failed to disclose the particular relationship between switch and time order configured above in *italic*.

The Examiner asserts that Langille teaches "inner MPLS," referring to paragraphs 0050-0052, thereof. (Office Action; page 3, line 3) Although the referenced portions and figures of Langille disclose the use of "inner" and "outer" LSPs, the Examiner has not pointed to any teaching therein to utilize inner and outer MPLS labels in the manner recited in claim 2, nor for the purpose of the claimed invention. First, neither Kuehnel nor Langille appear to be directed to transporting TDM time slots of a circuit switched connection from a first circuit switched node to a second circuit switched node through a packet switched network. More importantly, the Examiner has not pointed to any teaching in either of those references to encapsulate the time slots in a data frame, then stack the data frame with (i) at least one inner MPLS label uniquely addressing a PCM system within the second circuit switched node and (ii) at least one outer MPLS label identifying a fixed path of consecutive packet switched nodes within the packet switched network

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
